

# *OBRL Year-End Newsletter #28*

## *December 2015*

From the *Orgone Biophysical Research Lab (OBRL)*  
in Ashland, Oregon, USA.

<http://www.orgonelab.org>

*James DeMeo, PhD*  
*Director of OBRL*

**(Belated) Happy New Year 2016!**  
**From James DeMeo and OBRL**

**Oval Blue Bions, in a matrix of quartz rock dust.** Heated to red-hot incandescence, quickly immersed into sterile distilled water, then viewed in the OBRL Leitz Ortholux microscope with apochromatic/periplan true-color optics.

Details Below.

The OBRL Annual Newsletter is sent out once per year, in late December or early January. Subscribe to OBRL-News or visit the OBRL-Blog for more frequent notices. <http://www.orgonelab.org/OBRLNewsletter.htm>

**Here's an account of work at OBRL in 2015,**  
**and what's in store for 2016 and the future.**

## Dear Friends and Supporters,

This year passed with new publications and lectures, accepted into a few mainstream scientific publications and forums. Experimental investigations continued also into the spectroscopic properties of orgone-charged water, with a parallel study of natural rainwater and snowmelt. Work also transpired to complete the construction of a second large cloudbuster at the OBRL facility, adding to our abilities to draw in moisture from the nearby Pacific Ocean – results paid off in late 2015 and early 2016, discussed below.

Starting in mid-2015, international social turbulence occupied much time and study, with the massive Islamic invasion into Europe, something which my Saharasia work of the 1980s predicted would quickly take on a violent character, particularly regarding issues of sexuality – the relatively free social-sexual conditions in Europe and the Americas could only hope to provoke violent reactions from men of Islamic cultures, where even casual conversation between unrelated men and women is a cause for hysterical violence, to include “honor murder” of females for such a “sin”. And so as a consequence, we have seen outbreaks of massive Islamic gang-rape violence and terror murders all across Europe. Keeping track of this crisis has taken time from our usual work routine, as both friends and relatives in Europe and Germany specifically have come under serious threats from events which international media generally refuse to report about. The poison of “Political Correctness” has also spread widely, to silence critics of Islam. These events are an exact confirmation of predictions flowing from my Saharasia findings.

Other significant experimental work has nevertheless proceeded. My findings from many years of direct applications of the Reich cloudbuster were presented to the *10th International Conference on the Physics, Chemistry and Biology of Water*. A video of that lecture is now available on YouTube. One of my papers on the question of Cosmic Ether-Drift was published in the *Journal for Scientific Exploration*, promoting interesting discussions. A new Canon 60D SLR camera was matched up with our Leitz Ortholux microscope, to make some striking new images of oval blue-glowing bions (see the cover page). Two new books were published, along with four new editions of older works which had gone out of print. A series of scholarly essays were also written and posted to social media webpages, including a new presence on Facebook – something I have trepidations about, but we are always looking for new ways to make contact with the public, bypassing the many obstacles, slanders and censorship of sources like “Wikipedia”, or the typical mainstream media. All of these projects are described below..

Your interest in keeping abreast of my work as supported via OBRL is most appreciated. Please consider to make a donation, or to purchase our books, the older and newer ones, for both yourself, as well as for gifts to students and friends.

Thanks for your interest,

James DeMeo, PhD

Director of OBRL

<http://www.orgonelab.org>

## 1. New Published Books and Articles:

*Six New Books* were published in 2015, one new title and four new editions of older works, and one new translation into German language. The offerings of our in-house publications has grown so much over the last years, that I will simply give the basic title information with weblinks at the end of the list where they can be purchased. You can go to those weblinks to get further descriptive info, and to purchase. These are all now available, world-wide:

by James DeMeo:

- ***The Orgone Accumulator Handbook: Wilhelm Reich's Life-Energy Discoveries and Healing Tools for the 21st Century, with Construction Plans, Revised & Expanded 3rd Edition, 250+ pages.*** (English, with translated editions into German, Spanish, Italian and Greek languages).
- ***In Defense of Wilhelm Reich: Opposing the 80-Years' War of Mainstream Defamatory Slander Against One of the 20th Century's Most Brilliant Physicians and Natural Scientists.***
- ***Saharasia: The 4000 BCE Origins of Child Abuse, Sex-Repression, Warfare and Social Violence, In the Deserts of the Old World.***
- ***Preliminary Analysis of Changes in Kansas Weather Coincidental to Experimental Operations with a Reich Cloudbuster.*** (2010 Hardcover Reprint of a 1979 University of Kansas Thesis and Research Report.)

Edited by James DeMeo, compendiums of articles by many authors:

- ***Heretic's Notebook: Emotions, Protocells, Ether-Drift and Cosmic Life-Energy, with New Research Supporting Wilhelm Reich (Pulse of the Planet #5).***
- ***On Wilhelm Reich and Orgonomy: Reich in Denmark, Atomic Accidents, Bomb Tests & Weather, Cloudbusting in Israel & Namibia, Summerhill School Slandered, & Eyewitness Report on FDA Burning of Reich's Books (Pulse of the Planet #4).***
- ***Pulse of the Planet No.3: On Peaceful Versus Violent Societies, Nuclear Accidents, and Wilhelm Reich's Orgone Energy for Healing Land and Life.*** (Reprint 2015, in new Perfectbound edition).
- ***Pulse of the Planet No.2: On Cosmic Energy, Acupuncture Energy, A-Bombs & Earthquakes, and Wilhelm Reich's Orgone Accumulator.*** (Reprint 2015, in new Perfectbound edition).
- ***Pulse of the Planet No.1: On A-Bombs, Polar Motion, Cloudbusting, Droughts, and FDA/"Skeptic Club" Slanders of Wilhelm Reich.*** (Reprint 2015, in new Perfectbound edition).

by Emanuel di Pasquale:

– *Natural Love, and the Unnatural Attacks Against It.*

by Max Hodann:

– *History of Modern Morals: By a Central Participant in the European Weimar-Era Sexual Reform Movement.*

by Roberto Maglione:

– *Wilhelm Reich and the Healing of Atmospheres: Modern Techniques for the Abatement of Desertification.*

by James Edward Martin:

– *Wilhelm Reich and the Cold War: The True Story of How a Communist Spy Team, Government Hoodlums and Sick Psychiatrists Destroyed Sexual Science and Cosmic Life Energy Discoveries.*

The serious student of orgonomy should have *all* these high-quality books in their library, as they are excellent scientific information with essays validating and often expanding upon Wilhelm Reich’s sex-economic clinical work, with experimental reports corroborating Reich’s original orgone energy research findings, and related phenomenon. You can obtain them from these websites:

Natural Energy Works (USA): <http://www.naturalenergyworks.net>  
[Amazon.com](http://www.amazon.com) (USA), [Amazon.ca](http://www.amazon.ca) (Canada), [Amazon.co.uk](http://www.amazon.co.uk) (Europe),  
[Amazon.in](http://www.amazon.in) (India), [FishPond.au.com](http://www.fishpond.com.au) (Australia-Japan) and  
[BookDepository.com](http://www.bookdepository.com) (world-wide, often with free shipping).\

### **Also our most popular measuring instruments**

(available only from <http://www.naturalenergyworks.net> )

#### **– LM4: Experimental Life Energy Meter**

The LM4 has seen significant improvement in sensitivity and stability over the years. Several videos are now posted up on its selling page at Natural Energy Works, showing different experimental applications.

#### **– EM2: Broadband Electromagnetic Radio Frequency Meter**

#### **– Trifield 100XP Electromagnetic & Microwave Meter**

The EM2 and Trifield 100XP meters are essential tools for orgone energy accumulator safety and research, to identify electrosmog “hot spots” and “quiet zones”, to aid in where, or where not, to place your orgone accumulator, or your bed or work-desk. Or to aid in determining if your home is contaminated. Read the *Orgone Accumulator Handbook*, for discussions on these issues.

## 2. Lecture on DeMeo's Cloudbusting Field Experiments

I recently gave another invited lecture at the *Tenth Annual Conference on the Physics, Chemistry and Biology of Water*, as held in Varna, Bulgaria (on the Black Sea), 1-4 October 2015.

<http://www.waterconf.org/conference-program/2015.php>

This conference was attended by top water research scientists from around the world, including Nobel laureates and long-time investigators into the related subjects of water memory, water structure, and biophoton phenomenon. An Abstract, PowerPoint PDF of my research presentation, and YouTube of the actual lecture can be downloaded from the above Conference website, or from the weblinks below.

**“Restoring the Life-Properties to Atmospheric Water: A New Method for Ending Droughts, Tested in the USA, Israel and Africa”, by James DeMeo.**

A YouTube of this lecture is available at the Conference website above, and also here: <https://www.youtube.com/watch?v=q-bzIXIWvZ4>

An Abstract of this presentation follows.

**Restoring the Life-Properties to Atmospheric Water:  
A New Method for Ending Droughts, Tested in the USA, Israel and Africa**  
**James DeMeo, PhD** demeo@mind.net  
Orgone Biophysical Research Lab, Ashland, Oregon, USA

The problems of drought and desertification, with attending economic disaster and famine, have no orthodox approaches by which such conditions can be significantly mitigated. One can only offer food aid and other assistance, while everyone waits long periods for a change in the weather. In the 1950s, the controversial scientist Wilhelm Reich offered a solution to such crises. By his descriptions, proper use of his specialized antenna -- termed the *Reich cloudbuster*, and not to be confused with abundant distortions on internet -- could tap into an unusual energetic property of Earth's atmosphere and surface waters to influence weather systems. The genesis and dynamics of both individual clouds and larger storm systems could thereby be influenced, to trigger regional episodes of rainy weather and even end drought conditions.

As is well documented, Reich's unorthodox methods were subjected to a vicious media smear campaign and fraudulent legal attacks by the US Food and Drug Administration, moving against his related biomedical research, leading to his 1957 death in prison and the most outrageous incident of US Court-ordered bookburning in American history.

Starting in the 1970s, I consulted with people who had known and worked with Reich, and constructed a large cloudbusting instrument according to the original designs, acquiring copies of the *banned and burned* materials detailing Reich's theory of cosmic-atmospheric-biological energy, which he termed the *orgone energy*. My first field trials at the University of Kansas under non-drought conditions produced results confirming Reich's findings, in that 75% of 12 tests, each lasting from 2 to 4 hours on one day only, were followed within 24 hours by significant increases in percent cloud cover and rains, as determined from National Weather Service networks of rain gauges for the full state of Kansas. A separate determination confirmed a cloud-dissipation effect as well, using different operational techniques. A later systematic 1989 field trial I conducted in the American Southwest drylands on five separate pre-announced dates were followed by a region-wide *rainfall doubling* effect, starting on average within one day of commencement of operations, lasting for about a week thereafter.

On invitation of the Israeli government, I organized a drought-abatement expedition over six days in late November 1991, the time of an historically severe drought and water crisis of 3-years duration. That work was followed by the strongest Mediterranean storm system to arrive on the Israel coastline in 50 years. A pulsating storm-cycle thereafter developed without further interventions, bringing unprecedented record-breaking Winter precipitation.

In 1994, at the invitation of the Eritrean Ministry of Agriculture, a 30-year drought epoch in that small nation was ended by a two-week application of Reich's methods. A subsequent 5-year project was then organized, from 1995-1999, eventually using three Reich cloudbuster instruments in a tightly coordinated manner. Rains at 150% above normal developed over the East African region during that period of work. The storm systems following our work stimulated excellent rains over Eritrea and the entire Nile River Basin region. Lake Nasser, behind the Aswan High Dam, filled to capacity for the first time in its history, with large new lakes created in the open Sahara Desert by the Dam's overflow discharge.

Other major drought-relief expeditions were undertaken in the USA and overseas, with equally good success, affirming Reich's view that water possesses an energetic property which can be influenced by non-chemical methods over large distances. In spite of great hostility and slander attacks by the mainstream media and academic "skeptical groups", my work has verified Reich on this most controversial of his scientific discoveries.

**ESSAYS, from OBRL Social Media**

**3. Further Confirmations of DeMeo's Saharasia research findings.**

(Reposted from the *OBRL Wordpress Blog*, from 24 Feb. 2015)

<https://obrlnews.wordpress.com/2015/02/24/additional-confirmations-on-saharasia/>

From James DeMeo, PhD

A publication from 2006 recently came to my attention, providing additional proofs for the massive c.4000-3500 BCE climate shift which dried out the large *Saharasian Desert Belt* region (North Africa, Middle East, Central Asia), and some of the social changes which attended that climate change from lush forested grasslands, into hyperarid hardpan deserts and sand dunes:

\* Nick Brooks, "Cultural responses to aridity in the Middle Holocene and increased social complexity", *Quaternary International* 151 (2006) 29-49.  
[http://www.academia.edu/463993/Cultural\\_responses\\_to\\_aridity\\_in\\_the\\_Middle\\_Holocene\\_and\\_increased\\_social\\_complexity](http://www.academia.edu/463993/Cultural_responses_to_aridity_in_the_Middle_Holocene_and_increased_social_complexity)

This paper by Brooks was an excellent bit of work, but did not go into issues such as child treatment, status of women, sexual and family factors, nor the degeneration of social conditions into slavery or caste systems, and other factors so clearly related to social violence and warfare-conquest. Those were covered in detail within my *Saharasia* publications.

Brooks did not cite my prior work, possibly due to not knowing about it. However, Brooks' more recent study is interesting for several reasons beyond the basic confirmation of my determined chronology of the Saharasian climate transformations, as well as how that transformation elicited severe social changes in the Old World regions so affected.

For example:

A. Brooks documents a chronology for climate transformations within many of the same sub-regions of what I call the *Saharasian Desert Belt*, with dates that are very close to my own. The timing of climatic changes from wet to dry in the

Sahara Desert are also reflected roughly identically across Arabia, Mesopotamia, Central Asia and South Asia (the Indus-Sarasvati region). This aspect was thoroughly documented in my book *Saharasia*, in an archaeological-historical reconstruction spanning the period roughly from c.10,000 BCE to c.1900 AD. An analysis of social impacts of Saharasian desertification was also undertaken using standardized and peer-reviewed cross-cultural data from 1170 different world cultures, in a [quadruple-blind control procedure](#) that generated the first world maps of human behavior as derived from global ethnography. Numerous maps were generated of cultural-social factors revealing a Saharasian cultural-violence geographical pattern mirroring the Saharasian Desert Belt.

My findings were published in a major book, *Saharasia*, with additional summary papers in peer-reviewed history or anthropology journals, or as book chapters, going back to the original doctoral dissertation of 1986.

\* James DeMeo. "The Origins and Diffusion of Patrism in Saharasia, c.4000 BCE: Evidence for a Worldwide, Climate-Linked Geographical Pattern in Human Behavior", *World Futures*, 30:247-271, 1991  
[https://www.academia.edu/3674729/The\\_origins\\_and\\_diffusion\\_of\\_patrism\\_in\\_Saharasia\\_c.4000\\_BCE\\_Evidence\\_for\\_a\\_worldwide\\_climate\\_linked\\_geographical\\_pattern\\_in\\_human\\_behavior](https://www.academia.edu/3674729/The_origins_and_diffusion_of_patrism_in_Saharasia_c.4000_BCE_Evidence_for_a_worldwide_climate_linked_geographical_pattern_in_human_behavior)

<http://www.amazon.com/Saharasia-Origins-Sex-Repression-Warfare-Violence/dp/0980231647>

B. Additional teleconnections with similar dates of desertification are identified by Brooks in the Peruvian region of South America, indicating long-distance climate teleconnections from the Saharasian Desert Belt to distant world regions. I previously wrote about these long-distance influences in more modern contexts, in two papers, where the *primary desert region of Saharasia* was contrasted against all other desert regions around the world, as *secondary deserts*

which formed in climatic response to primary Saharasia:

\* James DeMeo. "Desert Expansion and Drought: Environmental Crisis (The Desert-Drought Map)", *Journal of Orgonomy*, Vol.23, No.1, pp.15-26 May 1989

[http://www.academia.edu/4436572/Desert\\_Expansion\\_and\\_Drought\\_Environmental\\_Crisis\\_The\\_Desert-Drought\\_Map](http://www.academia.edu/4436572/Desert_Expansion_and_Drought_Environmental_Crisis_The_Desert-Drought_Map)

\* James DeMeo. "The Desert-Drought Map", *Pulse of the Planet*, Vol.1, No.2, 1989, p.82 [https://www.academia.edu/4436591/The\\_Desert-Drought\\_Map](https://www.academia.edu/4436591/The_Desert-Drought_Map)

Slowly the world of classical science is catching up to ideas I wrote about going back to the early 1980s. And my ideas were in turn founded upon critical findings and theories of Wilhelm Reich, corroborated and expanded upon in my Saharasia work. Saharasia was also by itself also a solution to what Reich termed the "Riddle of the Origins of Human Armoring".

For the rational skeptic, I should also point out, the Saharasia findings have been subjected to extensive and constructive peer-review, as well as some destructive attacks. But the basic analytic methodology and findings had already been immersed in the acid of focused scientific critique and analysis, well before the first additionally peer-reviewed publications appeared. Long before the articles and Saharasia book were published, I had presented my findings before the *American Association for the Advancement of Science*, to the *Association of American Geographers*, to the *Arid Lands Society*, and to the *Association of Pacific Coast Geographers*, as well as at some smaller academic venues and conferences. Large groups of geographers, anthropologists and climatologists have reviewed my findings over many years. *Not once has any serious flaw in the data or methodology ever been identified*, nor has any *fact-based* criticism emerged into public discussion.

The findings nevertheless stirred up a lot of animosity within some sex-negative and/or politically-inspired circles. Elsewhere, it caused befuddlement in how a new method of geographic analysis was applied to answer ancient historical, ethnographic and psychological questions related to human behavior. Clearly, my Saharasia work gored many sacred cows and carefully-guarded bibliographies of the academic mandarins, and hence was for a long time placed in a prominent position on the *Index Expurgatorius* of modern scientism. Even many "Reich followers" find it too perplexing to fit into narrow world views based upon lingering mystical attitudes, or their "politically correct" ideas of multiculturalism, supposing that all human cultures are equally violent, or

equally sex-negative, or that genetics controls our potentials for violence, and therefore all human cultures are “the same”. Not so. While some human societies are more decidedly relaxed, sex-positive and peace oriented, the majority of human societies are suffering from moderate to high levels of sexual repression and disturbances, child abuse and sex-abuse, and low women’s status. And some cultures produce majority percentages of violent psychopaths, male and female, as a consequence. And today, those extremely violent cultures are still found in highest concentration across the *Saharasia Desert Belt*, dominated today by Islamic culture. (Heresy!)

The world of Natural Science is slowly catching up to the findings in my *Saharasia*, as new generations of scientists and scholars gravitate to ask some of the same tough questions, and stumble over the same findings as were raised and observed in my original field work, or as I dug out from old texts in libraries. Modern science is re-discovering similar geographical patterns and time-lines, as firstly described in my work during the early 1980s.

I subsequently had multiple invitations to submit summary papers in specialized scientific literature, but no mainstream academic press was willing to publish the book uncensored, with the full attention to detail as I demanded. So it was eventually self-published, with a newly updated 2nd edition containing an all-new Appendix article "Update on Saharasia", which goes into more recent findings in archaeology which support the overall discovery.

<http://www.amazon.com/Saharasia-Origins-Sex-Repression-Warfare-Violence/dp/0980231647>

For additional information, see the *Saharasia* book and "Update" article, and these prior reports:

#### **4. Regrettable Confirmations of Saharasia: Muslim Terrorists**

**Discover Saharasia.** The full ugly details are given here:

<https://obrlnews.wordpress.com/2014/06/20/muslim-terrorists-discover-saharasia-2/>

Below is a map currently being circulated by the Muslim Jihadi murderers. In this map they openly identify all the territories occupied by Islamic warriors in past conquests, plus all borderland regions which at one or another time in history had been conquered by various Muslim war-lords, but which were taken back by the original cultural inhabitants. By Islamic thought, those once-conquered territories, which were wrested from Muslim conquest via the Crusades or other major battles, are still "Muslim property". Once land is stolen by Muslims, it forever "belongs to them" by their thinking, and those lands henceforth become a chronic cause for further warfare to recapture them. To Islamic thinking, these are all "Muslim lands forever" and are "occupied territory" being "unjustly inhabited" by non-believer infidels.

Examples would be the "occupying" Spanish, French, Greek, Serbs, Bulgarians, Romanians, Hungarians, Russians, Chinese, Indians, Israeli Jews, Lebanese Christians, Buddhists, Hindus, Animists and various black African tribes. By Islamic thinking, these people are merely "temporary inhabitants" or even sub-human "aboriginals", currently occupying Islamic territory. They are all "occupiers" who, by Islamic thought, must be driven out from those lands, converted into Islam, killed off, or become dhimmi slaves and pay the ferocious annual *Jidza* head-tax, which is the Islamic tribute payment required for non-Muslims to remain alive within "Islamic territory" for an additional year.

Consequently, it is not surprising at all to see the following map being circulated by the Islamic jihad factions, nor to see that it strongly correlates with my original World Behavior Map, published years ago in my *Saharasia* book. (see next page) The ISIS Jihad map reflects both past and more recent Islamic conquests, which led to higher levels of violence and human armoring in every case. And that higher Islamic violence is what is reflected in my World Behavior Map, within the "extreme patrist, heavily armored" regions. Pre-Islamic cultures in Saharasia also were moderate to extreme in their violence, as with all the warring Empires, Pharaohs, God-Kings, and similar. Islam, however, has been unusually persistent and severely crushing of human freedoms, lasting nearly 1400 years.

If all this is a mystery to the reader, then review my *Saharasia* book, as a great predictor of the current epoch of Islamic violence, terrorism and mass invasions.

Above: *Modern Islamic State Map* of existing and intended conquest regions  
 Below: *World Behavior Map*, the black areas identify regions already conquered by mostly Islamic warrior-nomad armies as of c.1900 AD

+++++

## 5. *Additional* New Support for the Saharasia Findings

<https://obrlnews.wordpress.com/2015/06/17/new-support-for-saharasia-findings/>

Several new world maps have come to my attention which reflect the global Saharasian patterns as presented in my work back in the 1980s and 90s.

### A. *The Global Peace Index Map*

<http://www.visionofhumanity.org/#/page/indexes/global-peace-index>

This project began in 2008, and so reflects conditions approximately 108 years after the original c.1900 *tribal* ethnographic data presented in my *Saharasia*. It reveals the conditions within modern *nation-states*. These modern data indicates a serious expansion of global violence since 1900, notably within those nation-states along the borderlands of Saharasia proper. Nations of giant territories, such as Russia, China or Canada do not allow for differentiated region analyses within their territories, unfortunately, but the nation-state data nevertheless reveals the original Saharasian pattern, with major spreading of patristic-armored social violence (and wars) out into the Saharasian borderlands. The Global Peace Maps website also allows one to select conditions from c.2008 through 2015, which by itself reveals some of this spreading of global violence.

However, I seriously question the validity of most of the choices of indicator variables by this organization, which ignore issues relevant to child abuse, women's status, marriage freedom and general freedoms of thought or action. Slavery is not addressed anywhere, nor are caste systems, for example,

though both institutions require immense violence to accomplish. Chronic violence against women as in female sexual slavery -- found across the entire Islamic world as coercive arranged marriages and pedophile child-marriages -- is simply ignored. Adult sadism seen in the infliction of pain or trauma on children as from genital mutilations, or severe obedience training are not addressed either. And in some cases, the selected variables appear to have made their list only because they cleverly attempt to make Western democracies look just as bad as various totalitarian states. This I know as a typical Marxist ploy, what we would call “cherry-picking” of data sets (and ignoring others) so as to make propaganda maps.

For example, the two variables “access to weapons” and “homicide” are clearly related, but not in any straightforward way, the general false assumption being if the majority population has access to guns, they are necessarily violent people. This idea ignores how people with access to guns can protect themselves from criminal killers or totalitarian tyrants, who periodically commit mass-murder of unarmed populations. Private gun ownership is a bulwark against both violent criminals and tyrants in government.

“Access to weapons” is defined only as guns, and shows the USA, Italy, Greece, Latvia, Bulgaria to be identical to murderous totalitarian Iran, North Korea or Saudi Arabia, which is a fully false comparison. Meanwhile Communist totalitarian Eritrea and China are given a “more peaceful” identification as they don’t allow any access to weapons for their citizens. By that measure, the genocidal Soviet Union and Nazi Germany would show up on the “peaceful” side of calculations on that variable, given how citizen access to guns was banished in both regimes. “Weapons” did not include knives or stones, which also serve as a murder weapon frequently used by vigilante squads in the Islamic gun-banishing nations. Also, many statistics on gun violence, as in the homicide rates, do not address people defending themselves against armed criminals, thereby producing a more peaceful condition even as criminals are sent to their graves, or into hospitals, or merely warned away.

The homicide rates also show a different picture from “access to weapons”, reflecting a more accurate measure of “peace” -- but even so, “homicide” by itself is not the whole story when making international comparisons. For example, *democide*, the murder of civilians by their own governments, can kill far more people than homicides due to criminal actions, disputes or family conflicts. Communist China, Iran, North Korea and Saudi Arabia, which have among the highest rates of government executions and generally for political or theological reasons, are shown as having lower “homicide” rates (and ergo more “peaceful” conditions) than the USA. The slave-labor death-camps in Communist China and North Korea also escape

attention in the “incarceration rate” and “homicide” variables, which are restricted to civil prisons and non-democide deaths only. The “incarceration” variable does not address the fact that within totalitarian nations where you must plead to get a special exit visa to leave the country, *everyone is a prisoner*. Such nations are governed by quasi-military police forces, thereby giving Communist and Islamic nations – the latter of which deprives *all* women of passports or free travel without permissions from male relatives – a free pass. And overall the problem of *government-produced falsified statistics*, as are typical in Communist and Islamic nations, does not appear to be addressed at all.

The Global Peace Index therefore in larger measure has been "Politically Corrected" by using restricted variables corresponding to Leftist ideological premises, without sex-economic context as was the focus in my Saharasia maps. Nevertheless, a glimpse of the old Saharasian pattern still comes through for some of those variables.

The Old World adjacent to the Saharasian Desert Belt, for example, constantly shows itself to be in a chronically “less peaceful” condition on nearly all the variables by comparison to the New World. This factor was detailed in my *Saharasia* book, consequent to the later arrival in the New World of societies who carried violence from the Old World in their social institutions and belief systems, transplanting those social factors into their New World homelands. This factor alone significantly undermines the genetic theories of social violence, but is hardly recognized due to the irrational “wall of silence” erected against my Saharasia findings within the academic world, and also within some circles of contemporary oronomy.

*B. Freedom House Maps (continued on next page)*

<https://freedomhouse.org/report/freedom-world-2015/maps>

From this institute, the maps are not “politically corrected” and so we see more clearly, the spreading of the Saharasian influences throughout Africa, across the Middle East and into the Communist nations, whether or not they have recently been freed from a Communist government (no world region has recently been freed from Islam). The least-free nations are clustered within Saharasia or its borderland nations. And again, the Old World is far less free than the New World, on average. Those facts indicate, the maps depict issues of character structure, either the desire for and tolerance of freedom, or a basic fear and hatred of freedom, plus factors of political dominance, which force un-free and violent social conditions on a disarmed and conquered population.

*C. Health Risk Maps (continued on next page)*

<https://www.internationalsos.com/risk-outlook>

Where freedom and peace are absent, human emotional and mental health reflect a generalized highly-armored condition, and somatic health cannot help but to deteriorate. At minimum, the absence of freedom and peace reflects the same issues of human armoring which drives societies towards emotional plague behavior — as seen in social violence and restrictions on individual and collective freedom. Once again, the regions of greatest risk to health and safety are Saharasia and its borderlands, even where sex-economic factors are not included into the analysis.

Note in my *Sahasia* book, I have a separate chapter on "Expressions of Sahasia in Contemporary Demography", which presents these same-similar geographical patterns from data available in the early 1980s, including for several sex-economic indicator variables. These show a somewhat half-way set of distributions of armored violence, between what's in the c.1900 World Behavior Map, and these post-2000 world maps from various sources. What you see in the maps from the above three internet sites additionally confirms the original Sahasia findings.

**6. Correspondence: On Bions, Biogenesis, Cancer Biopathy and Brownian Motions** (Reposted from the OBRL Wordpress Blog, from 5 April 2015):  
<https://obrlnews.wordpress.com/2015/04/05/correspondence-on-bions-biogenesis-cancer-biopathy-and-brownian-motions/>

From James DeMeo, PhD

Recently I received several letters asking about Wilhelm Reich's discovery of the bions, their origins and development, and on the subject of *Brownian motion*, the jiggling of small particles in water, as seen in the light microscope. These prompted development of the following general response, a bare-bones summary with reference material for the modern day student of biology, and professionals. Some new information is also provided.

Over a five-year period in the mid-1990s, my institute, the Orgone Biophysical Research Lab (OBRL) sponsored annual Summertime lab seminars on "*Bions, Cancer Biopathy and the Reich Blood Test*". I was part of a team of professionals who made the microbiological preparations, lectures and demonstrations of bions and bionous processes, using high quality sterilization and ultra-filtration equipment, and the best light-microscopes available. These included a Leitz Ortholux light microscope and a Reichert microscope of the

**Free-floating bions in a preparation of autoclaved grass in water.**

**Oval blue bions within a matrix of quartz dust heated to red-hot incandescence and immersed into sterile distilled water, photographed only a few minutes later.**

same model used by Reich in his original experiments (donated to OBRL by Dr. Morton Herskowitz, with other apparatus donated by Dr. Robert Dew and Dr. Louisa Lance). Both of these microscopes had the best-available color-compensated apochromatic objectives and eyepieces, and were able to image living preparations down to 5000x.

A review of bions made from sand, clay, iron filings, disintegrated moss and grass, and from blood or tissues, were made as a matter of course during the several days of those annual Summer seminars, with many photographs. Their motional properties were also studied and captured on videotapes. Eventually I gave a lecture, *"Contemporary Bion Research: Support from Modern Biology"*, given at the *Second International Symposia on Pleomorphism* in 2000, showing various color images as recorded through the microscope during or after those seminars. An article on those seminars was also published in 2002, in the OBRL journal *Pulse of the Planet #5: Heretic's Notebook*, detailing the procedures and results, with photomicrographs of the samples we routinely prepared and observed: *"Bion-Biogenesis Research and Seminars at OBRL: Progress Report"* [https://www.academia.edu/4212001/Bion-Biogenesis\\_Research\\_and\\_Seminars\\_at\\_OBRL\\_Progress\\_Report](https://www.academia.edu/4212001/Bion-Biogenesis_Research_and_Seminars_at_OBRL_Progress_Report)

Eventually I prepared a YouTube video compiling various photos and video sequences made during the seminars. This video includes a few sequences of bionous motions of sand bions, or the rotation of bionous clumps en-process to formation of protozoans. One most simple demonstration comes by placing a small quantity of ordinary quartz-dust in distilled water, producing a most

intensive jiggling and dancing of the bions. A similar powerful motion is seen in the small round bions within blood plasma, best seen in darkfield and classically termed *chylomicrons*. I call them *nutritional bions* given how their abundance changes with dietary factors. See here:

<https://www.youtube.com/watch?v=-PVnS72IY8>

Those seminars provided the opportunity to replicate some of Reich's more complex bion experiments, as well as simpler ones. Over the years our team instructed around 130 students and professionals in the basic preparation techniques and processes for observations of bions, the bionous organization of protozoa, and also techniques and procedures for the Reich blood test.

As to the Brownian motion itself, there were a few points not included in the summary article I mention above, but which suggested these motions are not the product of temperature alone, nor even primarily. Bions expressed this jiggling motion at different intensities, but irrespective of temperature. The most intensive motions were observed in quartz powders, or glacial rock dusts, as sometimes used by innovative farmers and foresters for soil health.

There were anomalous variations in the motions observed on many occasions which had nothing to do with temperature, and which strongly suggested organotic parameters. For example, in the cool mornings, it was typical for the bions to show a strong movement and jiggling as seen in the light microscope — the preparations were a tiny bit of quartz or glacial rock dust in distilled or ordinary tap water, placed on the microscope stage with a cover slip, viewed at various magnifications from 500x to 2000x. However, around 4 PM or so, which is the peak temperature of the day, the bions on those same microscope slides would frequently just lay down on the bottom of the slide and do nothing, in violation of a direct temperature-motion relationship. One small particle might occasionally lift up from the bottom and dance around for a few seconds, but then settle back down to the bottom of the slide. The same slide would show an absence of motions during the night, but vigorous bionous motions would reappear the next morning and day, though never in direct proportion to temperature.

This phenomenon might be explained in observations seen another experiment I ran, in a systematic and automated To-T experiment, the temperature anomaly in the orgone accumulator. This also showed its strongest magnitude of effect at the peak noontime hour, but not at the time of peak daily temperature, in the later afternoon. Even though completely isolated from direct solar heating influences, there were no correlations between the max-min of To-T differentials to the max-min of bion motility, nor of either to the max-min of day-night temperatures. The timing of peak intensities of documented experimental observations in To-T, and the observed anomalies in bion motility,

suggest a causal *common functioning principle* in solar excitation and lumination of the Earth's orgone energy field, peaking out around the time of Solar Noon, and to which both bion motility and the accumulator interior temperature were responding. Of course, this empirical theory needs more systematic side-by-side To-T and bion motility experimental testing and verification before it can be considered secure. See: "*Experimental Confirmation of the Reich Orgone Accumulator Thermal Anomaly*"

[https://www.academia.edu/3677742/Experimental\\_Confirmation\\_of\\_the\\_Reich\\_Orgone\\_Accumulator\\_Thermal\\_Anomaly](https://www.academia.edu/3677742/Experimental_Confirmation_of_the_Reich_Orgone_Accumulator_Thermal_Anomaly)

One must also realize, the bions themselves are highly-charged vesicles of life-energy, and Reich called them *orgone energy vesicles*. He based this upon his early observations of *sand bions*, which produced a strong bluish and highly anomalous radiation with biological properties. Such bions are most obviously seen in preparations from beach sand, quartz dust or clays, heated over a torch to glowing incandescence, or from some kinds of slow biological disintegrations as with grass in water. They produce well formed ovoid shapes, like tiny robin's eggs of about 1 micron diameter (see the photos above) and nearly always with a glowing bluish interior and bluish energy field. These energy fields are excited into lumination by the microscope light source — and even more vividly blue when viewed in natural Sunlight, or (with eye protection) in UV-supplemented microscope light sources. Living red blood corpuscles also show a bluish energy field under color-compensated apochromatic optics. Bions from iron dust are somewhat different, also ovoid like a robin's egg, but red in color, and in my experiments were generally clustered together like grapes on a vine.

When two bions approach each other, they frequently are attracted together and create luminous blue-colored bridges between them, after which they rarely separate, but dance around together. This led Reich to suggest the phenomenon of *orgonotic lumination* to explain both the color intensity and the attractive force. This was one of several lines of evidence noted by Reich that the excited orgone energy had a bluish color with other unusual properties in such excited states, something which also has serious implications for gravitation. Today of course all the basic bion observations and laboratory experiments have been confirmed repeatedly, in many published papers with photographs, no matter how loudly the "skeptics" declare that bions "do not exist", or that "only Reichians" can see the bions.

My own work has also uncovered newer evidence supporting Reich's views about orgonotic lumination, at least in liquid preparations. Samples of orgone-charged distilled water, by comparison to identical uncharged distilled water control samples, will preferentially absorb light frequencies in the far UV range, between ~240-280 nm. A fluorescence reaction (lumination) in longer

wavelengths that encompass the blue frequencies has also been demonstrated. Such absorption and fluorescence reactions do not occur, or occur only weakly, in control water samples. See: "Spectrographic Signatures in Water Induced by Radiant Fields from Enclosures of Various Materials" by James DeMeo, presented to the *9th Annual Conference on the Physics, Chemistry and Biology of Water*, 2014. PowerPoint available from: [https://www.academia.edu/8815954/Spectrographic\\_Signatures\\_in\\_Water\\_Induced\\_by\\_Radiant\\_Fields\\_from\\_Enclosures\\_of\\_Different\\_Materials](https://www.academia.edu/8815954/Spectrographic_Signatures_in_Water_Induced_by_Radiant_Fields_from_Enclosures_of_Different_Materials)

My observations over those years of the Bion Seminars indicated, the most highly-charged blue bion particles had the strongest movements, suggesting the bion's own intrinsic charge determined its motility, all other factors being equal. As Reich noted, the orgonotic parameter in the bions appears to be the motor behind the "Brownian" motions, a point which Robert Brown came close to understanding in his discussion on "active molecules" — only years later did others (notably Albert Einstein) make the claim that Brownian motion was due to temperature effects alone, in yet another blow against empirical life-energetic findings by crude mechanism.

As Reich noted, his work suffered the burden of being "too much" for the average person, including the average scientist or physician. Too many puzzles were solved all at once, and in the bion experiments this is most noteworthy:

- A) A solution to the origins of life question.
- B) Solving the riddle of the origins of the cancer cell.
- C) Discovery of a new and unique biological radiation, the orgone energy.

And by my own observations of modern scientific discovery, Reich's work on the bions predicts such things as "apoptosis", or bio-forms in Martian meteorites, or the existence of entire ecosystems based upon hot nutrient bions from deep in the oceans along the hydrothermal vents, where photosynthesis is impossible due to the lack of light. The existence of ultra-hot temperatures forming copious bions spewing from deep within the Earth's crust, as also seen in the blue-glowing waters of thermal hot springs, would by conventional thinking never predict the presence of living forms. But according to Reich's empirically-based discovery of the bions, we anticipate such things, and are not surprised by them.

It is all still "too much" for most of natural science and medicine, but today there are serious cracks in the wall of opposition.

### **References for the Student of Orgonomy on Reich's *Bion Experiments***

Firstly, read Reich's original book on this subject which is foundational reading:  
**Wilhelm Reich: *The Bion Experiments: On the Origins of Life***

Secondly, consult Reich's work on the *bionous origins of the cancer cell*, in the process of *bionous disintegration* (termed *apoptosis* by modern scientists unfamiliar with Reich's work), and subsequent re-organization of bions into new amorphous or structured cellular forms, as detailed here:

**Wilhelm Reich: *The Cancer Biopathy***

Reich's scientific journals also contain additional papers on this subject, by himself and associates such as Dr. Bernard Grad, and they can be ordered from the *Wilhelm Reich Museum Bookstore*: <http://www.wilhelmreichtrust.org>

There also are a few newer books on the subject of bions, which add additional information to the subject:

**James Strick, *Wilhelm Reich Biologist***. I've already given the Strick book a 5-star review at Amazon, which is reproduced here:

<https://obrlnews.wordpress.com/2015/06/29/excellent-new-book-on-wilhelm-reichs-bion-research/>

Two additional recent works explore the questions raised by Wilhelm Reich, on bions, Brownian motion, and the origins of life.

**Peter Jones: *Artificers of Fraud: The Origin of Life and Scientific Deception***

**Roberto Maglione: *The Motions of Life: Was Einstein Really Modelling Brownian Movement?***

An older publication edited by James DeMeo is also still available, ***Heretic's Notebook: Emotions, Protocells, Ether-Drift and Cosmic Life Energy***. This book carries four different articles on the subject of bions and their properties:

- "Studies on the Origin of Life: The Preparation of Primordial Cell-Like Forms", by Bernard Grad
- "Some Observations on Reich's Experiment 20", by Maxwell Snyder
- "The Sanal Theory of Bong Han Kim: Bion-Like Processes in Acupuncture and Biology", by Dong Chul Kong and Hyun-Won Kim
- "Bion-Biogenesis Research and Seminars at OBRL: Progress Report", by James DeMeo

These titles are generally available at most online and better streetside bookstores, including the Reich books and journals from the Reich Museum (weblink given above). All other items can be purchased from here:

<http://www.orgonelab.org/cart/xbions.htm>

**7. Protoplasm** (Reposted from the OBRL Wordpress Blog, from 3 August 2015): <https://obrlnews.wordpress.com/2015/08/03/protoplasm/>

From James DeMeo, PhD

Recently I learned of several interesting YouTube videos on the issue of *protoplasm*, as expressed in the structure and motions of slime-molds. For those who don't know, slime molds are large basic single-cell ameboid type creatures which are found mostly in wild nature, forests for example, oozing up from the ground, or inhabiting tree stumps or other rotting material. They appear as if millions of ameba had suddenly decided to join together into one amorphous mass, with a break-down in their individual cell walls. Their nuclei remain intact, but without cell boundaries between them, with shared protoplasm constituting one large single-cell organism which can flow and pulsate, and move and grow, divide and then, return together again in one large mass.

One of the original films on slime molds and protoplasm was made by the Scottish scientist William Seifritz, recovered by the Alexander Lowen institute, as shown in the front part of the following YouTube video:

[https://www.youtube.com/watch?v=\\_ihSxAn4WR8](https://www.youtube.com/watch?v=_ihSxAn4WR8)

Another interesting YouTube on slime molds was made on the work of scientist John Bonner, here: <https://www.youtube.com/watch?v=bkVhLJLG7ug>

And here is an entire list of similar videos:

<https://www.youtube.com/watch?v=czk4xgdhdY4&list=PLBEA10586AA503D12>

One must ask, what is the central organizing organ within these slime molds? What makes them move, without muscles, and what motivates them to move in such organized manners, in this way or that, without any brain or nerves by which to organize their structure? They exhibit highly organized behaviors and movements, not just existing as a puddle of goo, but have no brain, no nerves, no muscles. So how do they accomplish such unified and highly-structured motility?

By viewing these videos, one gets clues related to the work of Wilhelm Reich on the existence of an organizing life-energy which itself charges up the protoplasm, and then by its excitation initiates and creates the pulsations and movements, the stretching and bending, elongating movements as found within both single-celled ameba and larger slime molds. As the energy moves and reacts, so too does the protoplasm react and move, assisted in higher life-forms by nerves and muscles, but still at root being of a fundamentally bioenergetic *orgonotic* nature.

Reich sought out the ameba as a model organism to test out his theories on vegetative life functions, that the "reaching out" into the world towards nutrition, pleasure, contact, love, light or warmth, or "contracting away" from the world in anxiety, pain and fear, as well as general pulsatory functions of different tissues and organ systems, were governed by a singular life-energy with bioelectrical characteristics, which could be excited to flow in the two basic directions — expansion and contraction – flowing through raw protoplasm in single celled life forms, or through nerves and muscles in larger, more complex organisms.

*Pulsation.*

Reich's ideas along these lines began with his work on the *Bioelectrical Investigation of Sexuality and Anxiety*, a remarkable book that is still a light-year ahead of most other research on these questions of bioelectricity, nerve impulses, and organismic motility. <http://www.amazon.com/Bioelectrical-Investigation-Sexuality-Anxiety/dp/0374517282>

One sees this principle of pulsation very clearly at work in the slime molds, giant organized blobs of protoplasm, lacking in brains or nerves or muscles by which it could organize and move itself, at least by conventional theories of biology. Consequently, they remain a mystery in biology to this very day, but gain some clear suggestions about their motional capacities from the work of Wilhelm Reich.

As Bonner concluded after 70 years of study, there is still much to be learned about these "lowly" creatures, which in turn impinges upon the motions and functions of all living creatures.

Thanks to Thanassis Mandafounis for sharing the video by Siefritz.

## 8. Suffer The Children 1, 2, 3

(Reposted from the OBRL Wordpress Blog, from 26 September 2015):

<https://obrlnews.wordpress.com/2015/09/26/suffer-the-children-1-2-3/>

From James DeMeo, PhD

Here are three items that caught my attention, for reasons as you will see. Tragic. They highlight major sources of intense suffering and human armoring every day, that work to destroy entire nations, but addressed in only minimal ways.

### **Suffer the Children 1.**

**UK: NHS Records More Than 1,000 FGM Cases In Just Three Months – See more at:** <http://pamelageller.com/2015/09/uk-nhs-records-more-than-1000-fgm-cases-in-just-three-months.html>

1000 cases of female genital mutilations (FGM) in three months is around 11 per day, and that's just the tip of the iceberg, only the known cases reported by NHS and only for the UK. How many in the Netherlands? France? Germany? Canada? The USA? There is no way Western police forces can suppress that, except by arresting and imprisoning the Muslim clerics and specialized mutilator-doctors and midwives that commit such horrors. And failure to do so, for whatever "PC" reasons, is a betrayal of children.

Just what do people in the West think they are going to accomplish, by importing into their nations millions of such people who do commit this barbarism on their own children? The welcome mat is placed out for these barbarian practices, with little or no serious opposition, but women like Hirsi Ali or Oriana Fallaci were put under death-fatwas by Muslim clerics, for daring to openly criticize such things, and then run out of Europe by left-wing Islam-loving politicians. They were threatened with imprisonment for daring to speak out against such monstrosities. Truth is the new "hate speech". Dare to openly criticize such barbaric Islamic practices in many European nations, and you are committing a "hate speech" crime, even while the barbarism itself — and the death-fatwas pronounced by bearded fanatics spitting out their hatred — is hardly punished nor efforts made to put a stop to it. Even the "anti-circumcision" groups are bungling this issue badly, being more "culturally sensitive" to Muslim butchers than they are to the children.

I wrote a full chapter section on both MGM and FGM in my book *Sahasia: Origins of War, Social Violence, Sex-Repression, Child Abuse*, complete with world maps and other details. <http://www.amazon.com/Sahasia-Origins-Sex-Repression-Warfare-Violence/dp/0980231647>

But most people stop up their ears, or have attacked me as a "hater" for daring to expose this kind of sexual violence against children. My *Saharasia* chapter also exposed how FGM is something done by older women to younger girls, just as MGM is performed by older men on boys. *The mutilated becomes the mutilator*, a severe form of emotional plague armoring, where living life and love is destroyed in the cradle, before it even has a fighting chance.

### **Suffer the Children 2.**

#### **Here's Why the Progressive Left Keeps Sticking Up for Pedophiles**

Salon Magazine recently gave a supportive and apologist's platform to a self-confessed pedophile to explain his urges, and basically try to brainwash their readers as to why his sickness and rapine hatred of children should be legalized.

<http://www.breitbart.com/big-government/2015/09/21/heres-why-the-progressive-left-keeps-sticking-up-for-pedophiles/>

It is important to note, that these same "progressive Left" people apologizing for pedophiles are the very ones who have been slandering Wilhelm Reich over decades, falsely claiming he was some kind of pervert. I wrote extensively on this, exposing these sick people, in my book *In Defense of Wilhelm Reich: 80-Years of Mainstream Slander & Defamation*

<http://www.amazon.com/Defense-Wilhelm-Reich-Mainstream-Defamatory/dp/0980231671/>

### **Suffer the Children 3.**

#### **Obama/U.S. military leaders tolerating pedophiles in Afghan barracks, punishing soldiers who try to protect the boys.**

<http://latino.foxnews.com/latino/opinion/2015/09/23/rick-sanchez-us-tolerating-pedophiles-in-afghan-barracks-obamas-abu-ghraib/>

The only error in this article is that the problem is not isolated to Afghanistan, but is problematic across the entire Islamic world. Europeans have correctly criminalized pedophilia, or child rape, but it exists basically in direct proportion to the severe taboos about women and healthy adolescent genital sexuality. But the "progressive" left is so infatuated with homosexuality and Islam, or so perverse in their own impulses, they turn a blind eye to widespread man-boy pedophilia (Child Rape!), or man-girl rape in the form of child marriages, and other types of Islamic misogyny – including “honor” murders of girls and women who rebel against the Islamic straightjacket.

What's most disgusting in this report, now mirrored elsewhere in recent reports, is how the Obama administration and upper-level military commanders are punishing American soldiers who dare to try and protect the boys, or dare to stand up to the Afghan military men who openly flaunt the boys they are raping. As the Obama "progressives" open up the military to open homosexuals, creating another set of rape victims (young male recruits), they prohibit opposition to pedophilia elsewhere American soldiers may observe it, and might intervene. The same Obama "progressives" open American schools to homoerotic pedophile propagandists as well, overall demonstrating how large segments of the Left-progressive movement are even more sexually disturbed than the conservative Christians against whom they so frequently hurl their anger – such as the pedophiles in the Catholic Church, who are a tiny minority as compared to the Islamic pedophiles, or the homosexual pedophiles. If apologetically permitted by a left-wing President, such things are OK to the Left. If forbidden by a conservative Pope, who tries to root it out, there is only fury and rage – perhaps justified in the latter case, but unjustifiably ignored and rationalized in the former case.

For background, read my *Sahasasia*. <http://www.amazon.com/Sahasasia-Origins-Sex-Repression-Warfare-Violence/dp/0980231647>

**12. OBRL SEMINAR 29-31 Aug. 2015 - *Sorry You Missed Out!***  
**Instructors: James DeMeo and Thomas DiFerdinando**  
Main lectures held at Southern Oregon University in Ashland, Oregon  
Go here for some nice photos of the events and people.  
<http://www.orgonelab.org/events.htm>

**The Orgone Biophysical Research Laboratory**

**Field Trip to Crater Lake National Park: Bluest Water in the World!**

**Note: Dr. DeMeo may host a weekend laboratory seminar at OBRL during Summer 2016. If interested, contact OBRL.**

### **13. Continuing Work on the Spectrographic Signatures in Orgone Charged Water, and Rainwater. Update Report**

Those who have followed my experimental investigations into the spectrographic properties of orgone-charged distilled water will recall how I discovered a far-UV absorption signature in such water, a spectral signature that was not present, or present only weakly, in un-charged control distilled water samples. I presented several papers on this subject to the International Conference on the Physics, Chemistry and Biology of Water, starting in 2009, and continuing in 2011, 2014 and 2015. This line of research also led to the discovery of a related *spectral fluorescence signature* that covers the *near-UV and blue frequencies*. This signal was a clear verification of Reich's concepts of "orgonotic lumination", that the orgone energy content of water would, under excitation by UV frequencies as found in natural sunlight, react with a deep and lustrous bluish glow. My lecture PowerPoints to the Water Conferences are available on my Academia.edu and ResearchGate.net websites, and videotapes of those lectures are also available on YouTube:

Academia.edu

What is new in these findings for 2015 is that rainwater from a good strong storm also shows this same set of far-UV absorption and near-UV+blue fluorescence reactions. Weak drizzles have not so far shown these results, indicating they are weakly charged as compared to heavier rains. These findings also parallel the widely observed but rarely understood phenomenon of the bluish "snow holes" regularly seen in deep snow banks, and possibly also for deep bluish waters pooling at the surface of glacier ice, as well as the fluorescent quality of ice-masses under solar excitation.

These are basic new findings in water research and orgone biophysics, and stand as a strong support for Reich, in the discovery of a completely new parameter which is strongly influenced by charging water samples inside the orgone accumulator. Such charged water, in turn, is spectrographically similar to vigorous healthy rains, but not in weak drizzles. Additional confirming investigations are underway, with a detailed research paper in the works.

## Spectroscopy of Strong Heavy Natural Rain/Snow (minus distilled water control spectra)

### Far-UV Absorption

### Near UV & Blue Fluorescence

A thick layer of snow gains a bluish color, as seen at a right-angle inside the OBRL Solarium, illuminated by sunlight on the opposing exterior side.

#### **14. Research Project: *CORE: Western Drought Emergency***

In 2014, a lot of work went into repairing and upgrading two large cloudbusters at the OBRL field site, with plans to put them into use as soon as possible thereafter. One of these units was repaired, though barely, at the time when natural rains were usually anticipated, in Fall of 2014. The efforts at OBRL were coordinated within the larger *CORE Network*, of skilled cloudbuster operators and a few apprentices, working from four different stations along the West Coast. One in Oregon, and three in California ranging from Mt. Shasta to San Diego. A study of rainfall patterns for Winter 2014-2015 obtained from official sources indicated rainfall totals were higher in the regions surrounding every one of the field operations stations, but lower elsewhere. This indicated a good local results, but also that we had not yet taken down the basic energetic blocking which led to the drought problem in the first place. A preliminary discussion of the Winter 2014-2015 events was given in the last OBRL Newsletter #27.

Starting in late 2015, the overall results were better. A second cloudbuster was repaired and put into operations at the OBRL field site by October 2015, again in cooperation with the CORE Net operators. By mid December, rains and snows were falling all across the West Coast, including into very dry drought regions of Southern California. Nearly a meter of snow had accumulated at the OBRL facility east of Ashland, at 4300' elevation, and even more along higher mountain territory. Natural weather pulsations had been restored, and all operations were terminated in late December, letting Nature take its course. We hope this good situation will continue naturally for the next few months, without the need for further CORE work. It is a greatly improved situation following about three years of drought, and the second largest snowfall seen in this area for 20 years. A more detailed weather analysis will be required before saying more about it.

I should also mention, a strong effort has been made over the last four years to gain financial and logistical support either from government agencies in California or Washington, DC, or from wealthy farmers in the California Central Valley regions, to fund a more ambitious effort of drought-abatement that could have benefited the entire Southwest. Government agencies and top political leaders were directly contacted, as were a few of the more wealthy farmers. The reaction overall has been a loud silence, with only one return inquiry out of about 100 outreach efforts. Only a few private individuals without the financial means to fund such an undertaking have expressed interest in our efforts.

The situation is one of “armored bureaucracy”, where the entire agricultural infrastructure of water resources in California – to include the cloudseeders,

irrigation districts, reservoir owners, irrigation-desiring mega-farms, well-drillers, pipeline developers and those wishing to build numerous mega-million desalinization plants – has no serious interest in natural rainfall, even if it means that forests and small towns burn down, or entire communities are devastated due to lack of drinking water and economic collapse. Natural rains means, the irrigation infrastructure loses money, and gets cut off from a river of taxpayer funding. Government water bureaucracy and regulatory agencies also get swollen budgets during drought, with no motivations to try anything that would end the gravy train. The authentic CORE discoveries of Reich also constitute a risk of public-skeptic ridicule if they did ever provide assistance. This is in addition to the emotional threat, resurrecting the older concepts of cosmic energy, which is today smashed down by modern medicine, physics and meteorology. Nevertheless, CORE Network produced limited good results.

## IMPORTANT BOOKS YOU SHOULD HAVE IN YOUR LIBRARY

***Sahasia***: Findings made more than 15 years before 911, still pertinent and essential to understand the terrorism, violence, misogyny and rapine predatory behavior of Islamic culture -- the deadly sex-economic disaster within Islamic regions -- now being imported into Europe and North America, by irresponsible politicians and their supporters.

**For full details, get the book:**

***Sahasia: The 4000 BCE Origins of Child-Abuse, Sex-Repression, Warfare and Social Violence, In the Deserts of the Old World***  
by James DeMeo

Available internationally from here:

<http://www.naturalenergyworks.net>

or here:

<http://www.amazon.com/Sahasia-Origins-Sex-Repression-Warfare-Violence/dp/0980231647>

**ALSO:**

***In Defense of Wilhelm Reich: Opposing the 80-Years' War of Mainstream Defamatory Slander Against One of the 20th Century's Most Brilliant Physicians and Natural Scientists***, by James DeMeo

Available internationally from:

<http://www.naturalenergyworks.net> and:

<http://www.amazon.com/Defense-Wilhelm-Reich-Mainstream-Defamatory/dp/0980231671/>

***In Defense of Wilhelm Reich*** unmask's Reich's worst detractors:  
*Political leftists and advocates of the poisonous new "Genderism".*

**REVIEW of *In Defense of Wilhelm Reich***, by Thomas Diferdinando:

<https://obrlnews.wordpress.com/2014/06/12/book-review-in-defense-of-wilhelm-reich/>

A hearty thanks to Mr. Diferdinando for his kind words.

## ***OBRL Funding Request***

### **Orgone Biophysical Research Lab**

#### ***Funding James DeMeo's and OBRL's Fourth Decade of Orgonomic Research***

<http://www.orgonelab.org/donate>

All the above-described research projects and publishing efforts were made possible by Dr. DeMeo's own hard work, helped by various volunteer associates, *and most essentially by the generous donations and book-purchases of OBRL supporters. Your Financial Support is needed and very much appreciated.* We are soliciting funds today primarily for continuing laboratory experimental work at the OBRL, notably for the water spectroscopy and Core field-work underway.

#### **You can either DONATE ONLINE**

<http://www.orgonelab.org/donate>

**Or you can send a check made out to "OBRL" or to "Orgone Biophysical Research Lab", and send to PO Box 1148, Ashland, Oregon 97520.**

OBRL is an IRS-approved 501(c)(3) non-profit foundation, established in 1978, and your donation is tax-deductible.

***Please also consider to remember OBRL in your Testament or Bequests.***

++++++

**Due to the high costs of printing and mailing, Internet and email are today our primary communication methods.**

#### **Get on the automated OBRL Yahoo e-lists**

**(if you have not already done so).** Help us to keep you informed.
