

OBRL Quarterly Newsletter #23 December 2010

This is the infrequent, Quarterly Newsletter from the *Orgone Biophysical Research Lab (OBRL)* in Ashland, Oregon, USA. <http://www.orgonelab.org>

James DeMeo, Ph.D., Director of OBRL

Winter Christmas Holiday Greetings from James DeMeo and OBRL

**Wintertime Scene at the Orgone Biophysical Research Lab (OBRL)
In the Siskiyou Mountains, near Ashland, Oregon, USA**

It has been a *full year* since our last Newsletter, due to a very busy work-schedule. Here's what's been going on at OBRL, and what's in store for the future.

1. New Book by James DeMeo

Banned and Burned by the FDA!

"Orgone Energy Does Not Exist" declared a US federal court judge in 1954, based upon journalist and FDA slanders, ordering the destruction of all publications bearing the forbidden word "orgone". Dr. Reich was later hauled off to prison, where he died. A scandal worse than the "Scopes Monkey Trial" and yet the facts about Dr. Reich continue to be concealed or misrepresented.

In this book, former university professor and natural scientist James DeMeo draws from his extensive personal investigations and experiments to present the facts about Reich's discoveries, specifically focusing upon the controversial *Orgone Energy Accumulator*, which is a bona-fide form of *Energy Medicine* used the world over. Here, the reader will learn how to build and safely use orgone blankets and accumulators, with details on orgone-charged *Living Waters* of natural hot springs and healing water spas, and many other related issues.

Learn how to concentrate and work with the blue-glowing orgone (life) energy using simple and readily-available materials. A limitless supply is freely available from the atmosphere. Includes many photos and diagrams plus two appended research articles, bibliography, index and weblinked references.

Orgone-Charged
Seedlings

Ure-Charged
Control Seedlings

* A newly expanded and 3rd Revised 2010 edition of *The Orgone Accumulator Handbook* is now available. Subtitled *Wilhelm Reich's Life-Energy Discoveries and Healing Tools for the 21st Century, With Construction Plans*, this new edition is 100 pages larger than prior editions, with many new photographs and diagrams taken from OBRL research projects and Prof. DeMeo's published works. The book summarizes Dr. Wilhelm Reich's discovery of the orgone energy and his major experimental confirmations, with references to con-

firming studies by contemporary research scientists. It carries two Appendix documents, one being a German university study proving the effects of the orgone energy accumulator on human physiology, and another detailing evidence for the *cosmic ether* of space, with comparisons to Reich's orgone energy and the current ideas on "dark matter". The book has new sections on full-spectrum lighting, and on orgone-charged, blue-glowing *living water* used as a therapy at health spas and natural hot springs today, and in history. This new edition carries updated information on the best

materials for orgone accumulator construction, with full construction plans for top-notch orgone blankets and accumulator boxes, plus a chapter section presenting *New Research on the Persecution and Death of Wilhelm Reich*.

The Orgone Accumulator Handbook. Wilhelm Reich's Life-Energy Discoveries and Healing Tools for the 21st Century, with Construction Plans. Newly Revised and Expanded 2010 Edition. by James DeMeo, PhD Foreword by Eva Reich, MD Appendix by Stefan Mischenich, MD ISBN: 978-0980231632 Softcover 5.5" x 8.5" 262 pages Retail Price \$26.95 US, plus shipping. Available in the USA from the OBRL online bookstore: <http://www.naturalenergyworks.net>

Non-USA orders are available from most international Amazon websites, such as amazon.co.uk, amazon.ca, amazon.it or amazon.de.

2. Another New Book by James DeMeo:

* Publication of a 1979 field research study confirming Wilhelm Reich's atmospheric research.

Preliminary Analysis of Changes in Kansas Weather Coincidental to Experimental Operations with a Reich Cloudbuster.

This is a work of historical significance, an experimental study reproducing parts of the late Dr. Wilhelm Reich's controversial atmospheric research, specifically the technique of *Cosmic Orgone Engineering* (or "cloudbusting"). This study took place in the late 1970s at the University of Kansas, Geography-Meteorology Department, as part of the author's graduate-level research, demonstrating changes in cloud cover and rainfall across the state of Kansas as the apparatus was operated. Reich's original findings had been dismissed as "impossible" by the scientific community of his day, stirring up such outrage that his writings were literally *banned and burned* by Federal bureaucrats, who also threw Reich into prison on fabricated charges, where he died in 1957. This particular study was the first university-level investigation into the most extreme of Reich's claims - of an atmospheric energy which could be affected by his cloudbuster invention to bring rains over widespread areas, even during droughts or in deserts. The study verified Reich's claims. This publication of the original study also includes a major separate work as an Appendix, *Evidence for the Existence of a Principle of Atmospheric Continuity*, which makes the argument for a renewed examination of the old cosmic-ether of space, as a parallel concept to Reich's orgone energy discovery. It also reviews similar inexplicable long-distance energetic phenomenon in the natural world which require a similar mechanism, such as solar-terrestrial phenomenon.

Preliminary Analysis of Changes in Kansas Weather Coincidental to Experimental Operations with a Reich Cloudbuster. With the Appendix: *Evidence for a Principle of Atmospheric Continuity.*

And a New Preface, 2010. by James DeMeo, PhD

ISBN: 978-0962185540 8.5" x 11" 186 pages

Retail Price \$59.95 US plus shipping. Limited Edition Hardcover.

Available in the USA from the OBRL online bookstore:

<http://www.naturalenergyworks.net> Non-USA orders are also available from most international Amazon websites, such as amazon.co.uk, amazon.ca, amazon.it or amazon.de.

3. Two New Journal Articles by James DeMeo

* Prof. James DeMeo's article, "Following the Red Thread of Wilhelm Reich: A Personal Adventure", was recently published in the October-December 2010 issue of *Edge Science* journal (p.11-16), produced by the *Society for Scientific Exploration*. Copies of the full issue are available as a free PDF download, from here: <http://www.edgescience.org/> The article alone may be downloaded from here: [0.5 MB PDF Download](#)

* Another article by Prof. DeMeo, "Experimental Confirmation of the Reich Orgone Accumulator Thermal Anomaly", recently appeared in the peer-reviewed journal *Subtle Energies and Energy Medicine*, 20(3):1-16, 2010, as published by the International Society for the Study of Subtle Energy and Energy Medicine (ISSSEEM). This paper reported the results of a multi-year experiment confirming Reich's To-T thermal anomaly observations. Copies are available by subscription only: <http://www.issseem.org/journal.cfm>

4. New Translations of Saharasia Summary Article

Two new translations, in Italian and Korean, are now available as free PDF downloads, of Prof. DeMeo's summary article on the Saharasia discovery. A big thanks to the translators, Daniela Enrico Bamberg, and Nuri Kim:

* Italian Translation: "The Origins and Diffusion of Patrism in Saharasia, 4000 BCE: Evidence for a Worldwide, Climate-Linked Geographical Pattern in Human Behavior", Internet Publication only: http://www.orgonelab.org/saharasia_it.htm

* Korean Translation: "The Origins and Diffusion of Patrism in Saharasia, 4000 BCE: Evidence for a Worldwide, Climate-Linked Geographical Pattern in Human Behavior", Internet Publication only: http://www.orgonelab.org/saharasia_kr.pdf

5. Space Energy Conference, Seoul, South Korea

Prof. DeMeo also was an invited speaker at a recent *Conference on Space Energy* held in Seoul, South Korea, on October 6th. The event was organized through the *Korea Research Group for Space Energy*, the *Korean Institute for Science and Technology*, and *UNEP Korea*. His lecture was on "Experimental Confirmation of Wilhelm Reich's Life-Energy Research".

Special thanks to Prof. Hyun-Won Kim of Yonsei University, and Prof. Gun Woong Bahng of the Korean Research Institute for Space Sciences for their kind invitation and hospitality. Details on the Conference are found in both Korean and English on the website of the Seoul Life Energy Center:

<http://www.spaceenergy.co/index-en.php>

Prof. DeMeo also gave an invited introductory presentation on the orgone accumulator to Electrical Engineering students at Yonsei University in Seoul.

6. Color Bion Photos Now Available in Article Reprint

One of Prof. DeMeo's older articles, "Bion-Biogenesis Research and Seminars at OBRL: Progress Report" from *Heretic's Notebook* 2002, carried quite a few black and white photo-images. This paper was recently republished with the original color images, available now as a free [1 MB PDF Download](#), for public distribution. The color article is also now available as [Turkish-Language PDF Download](#). A big thanks to Serdar L. Cetin, for making the Turkish translation.

7. New Evidence on the Persecution and Death of Wilhelm Reich

The new 2010 edition of the *Orgone Accumulator Handbook* (Point #1, above) carries a new chapter section on this subject, which has also been posted to internet. Here:

New Evidence on the Persecution and Death of Wilhelm Reich
<http://www.orgonelab.org/ReichPersecution.htm>

The article summarizes new evidence that Reich's major detractors were, just as Reich declared, and as previously documented in Jim Martin's book *Wilhelm Reich and the Cold War*, Communist Party operatives and even members of Soviet/KGB-controlled spy rings, working clandestinely in the USA. It also exposes efforts by the NKVD -- the early forerunner of the KGB -- to track down and spy upon Reich during his time in Scandinavia. One of Reich's Copenhagen associates was eventually arrested and sent off to disappear in the Soviet gulag death-camps. Internal Soviet documents, unearthed from Archives after the collapse of the Soviet Union, inaccurately declared Reich to be one of the much-hated "Trotsky-ists". The article exposes how the worst and most ugly smear articles attacking Reich in the 1940s and 1950s were penned by Comintern activists for publication in magazines run by KGB operatives, how the top FDA field inspector in charge of the Reich investigation was himself a probable Communist mole, along with other alarming details. The article also indicates how one of Reich's own attorneys was, unbeknownst to him, literally up to his eyeballs in Communist Party activities, with clear Soviet sympathies.

The web-based version of this article provides a PDF download link to a related article by John Wilder "CSICOP, Time Magazine and Wilhelm Reich", as taken from *Pulse of the Planet* #5 (*Heretic's Notebook*). You can get that here: <http://www.orgonelab.org/WilderOnTimeCSICOP.pdf> Wilder's article extends the analysis to expose the hard-left and even Stalinist backgrounds of many of the contemporary Reich-haters.

In short, the old idea that Reich was destroyed by "American right-wingers" and "Christian McCarthy-ites" and such, is shown to be false at its core. It was *Red Fascists* (and not typically moderate conservatives, nor old-fashioned anti-socialist liberals) who bear the primary responsibility for Reich's destruction, the same kind of people who today continue attacking Reich's *research legacy* and modern-day organomic research. Their major social identifications are the left-oriented and mud-slinging "skeptic" groups and their socialist allies in authoritarian Big Medicine. These articles are now available for free and open sharing internationally.

Of related interest, here is a controversial essay by Prof. DeMeo, also recently posted to the OBRL website:

**Karl Marx and Friedrich Engels:
Advocating Slavery, Racism, Ethnic Hatreds, War and Genocide
Mocking Justice, Freedom, Democracy and Equality
Contempt for the Poor, Workers, Farmers, Moderates
The Hidden History of Marx and Engels.**
<http://www.orgonelab.org/MarxEngelsQuotes.htm>

8. An Open Letter on the Chemtrail Claims

October 13, 2010

Dear (deleted),

If I could find even one major component of the chemtrail claims that was supported by proofs or anything solidly empirical or scientific, I might have more sympathy for it. But I cannot, and have a low confidence that you or anyone else could provide anything which withstands serious scrutiny. The “chemtrail” advocates also today include more outright fraud and photoshopped fabrications in their inventory of claims. See here:

<http://contrailscience.com/fake-hoax-chemtrail-videos/>

This contrailscience.com website is the best one I know of to address the issue from an empirical and scientific viewpoint. May I suggest, you spend an evening reading it. The whole thing.

These “chemtrail” claims are also pure poison for orgonomy, given the frequent references to Wilhelm Reich in the “chembuster” and “orgonite” “solutions” being claimed in the “battle against chemtrails”, or against “shape-shifting space reptilians”. You will remember my own webpage covering that aspect of the subject:

<http://www.orgonelab.org/chemtrails.htm>

Rather than believing in unproven government conspiracies about chemtrails, which require tens of thousands of people to lie and supposedly poison and kill their own loved ones and countrymen, I would suggest to apply your PhD-level capacities and consider it is the smaller number of chemtrail advocates who are the big liars and fraudsters, cherry-picking whatever they find convenient from classical medicine or air pollution research, concocting wild claims and photoshopping fake photos and videos, and other things to support their own grand conspiracy to sell plenty of

books and DVDs to all-too-willing believers. In this regard, it is not too different from the widespread 911 conspiracy theories, about an “inside job”, or about the “evil Americans using HAARP to create the Indonesian tsunami”, or whatever natural disaster happens around the planet. And by no accident, the same people and websites promoting “chemtrails” frequently promote those other things.

I just did a small experiment, a Google search on various words related to these issues, and showing the following numbers of weblinks which came up for each of them:

“chemtrails” 2,800,000 weblinks
“chemtrails + orgone” 200,000 weblinks
“orgonite” 67,600 weblinks
“chemtrails + chembuster” 49,300 weblinks
“chemtrails + wilhelm reich” 43,700 weblinks
“Montauk Project” 38,900 weblinks
“Wilhelm Reich” 396,000 weblinks
“orgone energy accumulator” 89,500 weblinks
“emotional plague” 66,200 weblinks
“orgonomy” 28,900 weblinks
“cancer biopathy” 14,400 weblinks
“infant trauma” 13,500 weblinks
“Wilhelm Reich Museum” 3,920 weblinks
“desert dusts” 2,020 weblinks
“bionous disintegration” 282 weblinks

What this tells me is, orgonomy is being increasingly re-defined by concocted mystical nonsense, and that more people want a de-sexualized orgone energy without social or personal consequences, integrated into fantastic conspiracy theories about shape-shifting space alien reptiles, than who want the original and full measure of Wilhelm Reich’s natural science.

Best wishes,
James DeMeo, PhD

PS. Along similar lines, the distortion “WR Mysteries of the Organism” brings up 1,210,000 weblinks, while Reich’s “Function of the Orgasm” brings up 753,000.

9. Plan ahead for the Summer 2011 *New Research in Orgonomy* Conference, which will take place in Karavomilos, Fthiotida (Fthiotis), in Central Greece, in August 2011. Check here for details and updates:
<http://www.orgonomyconference.org>

10. Free PDF Download of *Offshoots of Orgonomy* back issues.

The #2 issue of *Offshoots of Orgonomy* was recently posted to the OBRL website, available for free downloading as a 40.5 MB PDF. This publication was produced by the late Lois Wyvell, Wilhelm Reich's personal secretary, who passed away in 2005. The publication sold only a limited number of copies, and the remaining inventory sat in boxes in a basement location for several years, before being rescued, cleaned up and offered again to the public, courtesy of Marjorie Grubb, Joe Heckman, Theirrie Cook and James DeMeo.

A total of 15 issues were published, filled with interesting articles by both professionals and laypeople, students of orgonomy and "old hands" familiar with Reich's work over decades. The first two issues, #1 and #2, sold out some time back, so both of those are now available for a free download the OBRL bookstore. Here:

<http://www.naturalenergyworks.net>

Go to the above web-link, and scan down on the left-hand side list for *Offshoots of Orgonomy*. The other issues #3 - #15, which are collector's items, remain available for purchase at a modest price.

11. OBRL YouTube Videos Continue to Gain Interest

The video on "Wilhelm Reich and the Orgone Energy" now has over 170,000 views. If you haven't done so already, take a look:

* **Wilhelm Reich and the Orgone Energy**

<http://www.youtube.com/watch?v=sPV-JExUPns>

Related: * **John Ott: Exploring the Spectrum**

<http://www.youtube.com/watch?v=bw6hcTGND3c>

Another YouTube video is now in preparation, on the subject of James DeMeo's *Sahasasia* discovery and book, available in 2011.

12. OBRL-News Tweets on Twitter

As another social experiment, we have set up the OBRL-News postings to automatically post out their titles on Twitter, which will also produce weblinks for downloading of the full items from the OBRL-News webblog. If you wish to get those Twitter tweets, then sign up using this weblink:

<http://twitter.com/DrJamesDeMeo>

If you already have a twitter account, you can then login and add your name to the list for the account of: **DrJamesDeMeo**

The same items will continue to go out on the OBRL-News e-mail system at Yahoo Groups. <http://tech.groups.yahoo.com/group/OBRL-News-Bulletin>

Happy tweeting.

13. Harvest Moon Photo, 23 Sept. 2010, from the OBRL Observatory

Click here for a larger image:

<http://www.orgonelab.org/graphics/Observatory/Moon23Sep2010.jpg>

More to come, as we gear up for a project to photograph the “blueness of space”.

14. On-Going Research at OBRL

Various research projects continue at OBRL, though we have very little new to report on them beyond what was reported in our last OBRL Newsletter #22 from December 2009. It is suggested to review that Newsletter issue as background to what is given below. You can download that issue separately from here:

<http://www.orgonelab.org/OBRLNewsletter/22OBRLDecember2009.pdf>

* Spectrographic Research at OBRL Work continues on a project to document the effects of the orgone energy accumulator upon water and other liquids. OBRL obtained in late 2008 an Ocean Optics UV-VIS Spectrophotometer, with a range of 200 to 900 nm. Preliminary efforts produced no apparent results, but suggested the standard 1-cm cuvettes were too narrow to allow for sufficient interaction of the various spectral frequencies in what was a too-small solution. Consequently, in 2009, we obtained a stronger selective multi-spectral light source for fluorescence spectrometry. Special new UV-transparent cuvettes of 10-cm length were also obtained, to give a longer light-path for evaluation of water samples. Evaluations now continue on the change in water structure as charged inside an orgone energy accumulator. Some preliminary tests have been made in this direction, but also with mixed result to date. The spectrometer itself at one point malfunctioned, requiring us to learn a complex procedure to re-load its firmware. A cooperative experiment was also made with Roberto Maglione, on spectral shifts within chemical mixtures, such as organic acids in ethanol, as per a paper presented by him at the 2009 OBRL *Conference on New Research in Orgonomy* (see the Abstract booklet for 2009, which can be downloaded from the *Conference* webpage, described above in Point #9 above). Prof. DeMeo is now attempting to replicate the effect.

* Delayed Experimental Analysis Several extended experiments run over several years were terminated in 2008-2009, but still have not been subjected to a data analysis. OBRL has no permanent laboratory staff to assist in such projects, which delays presentation of results. These include review of data from a sensitive “stationary GPS” experiment, for a possible ether-drift sidereal-day signal. Data analysis also is necessary for several years of a NaI crystal scintillation experiment conducted inside a strong orgone accumulator. The scintillation counters are similar to what is used in “dark matter” and also “bio-photon” experiments.

* Ongoing Orgone-Charged GM “VACOR” Radiation Experiments

Over the last five years, a constant orgone charging of GM-type radiation-detection equipment has taken place at OBRL, within our large orgone accumulator darkroom. These experiments have produced a constant anomaly starting during the second year of charging, yielding anomalously high reactions in the hundreds or thousands of counts per minute (CPM), when by nature they should only be one or several CPM. During the recent years of low sunspots, however, the reactions nearly vanished. Now that some sunspots and solar activity has resumed, the VACOR-GM counters have also slowly resumed in activity, sometimes showing decidedly increased reaction over the same days when a large sunspot moves across the Sun. This is highly anomalous. All these effects – the higher CPM reactivity when charged inside orgone accumulators during high sunspot periods, and the relative vanishing of effects during periods of low sunspots -- were firstly noted by Wilhelm Reich, and are anomalous to classical physics.

* Continuing High-Vacuum VACOR Experiments These were reported a bit in our last Newsletter. Investigations continue, though we have nothing exacting to report at this time. Below is a photograph made from several years ago, which was a confirmation of Reich’s own photos of lumination within orgone-charged high-vacuum tubes. This effect occurred in our experiments without the application of any external electrical power, only through gentle hand-stroking of the tube.

Blue-Glowing Orgone-Charged High-Vacuum Tube

* Orgone Accumulator Electrostatic Experiments

As described previously, we are seeking a method for making extended measurements of the charge density inside an orgone accumulator, as compared to the outside. One of Dr. Reich's original observations was that a standard static electroscope would yield a slower discharge rate inside an orgone accumulator as compared to outside of it. OBRL has very good electroscopes and this effect has been repeatedly replicated, though requiring the experimenter to sit quietly with the instrument over long periods. We have automated some of the procedures, making the measurements more reliable and precise, notably by adding several "photogate" detectors to a standard static electroscope, by which the subtle time-of-descent motion of the deflector arm of the instrument can be measured down to fractions of a second. However, a skilled instrument-maker is required to develop a fully-automated apparatus.

Kolbe-type Electroscope, with Vernier Photogates. Used for precision measurement of the time of spontaneous discharge. Still one of the best instruments for monitoring of charge-density inside the orgone accumulator.

One interesting aspect which developed from our work, using different voltmeters to see if they could substitute for the static electroscope, was the detection of the well-known *Carnegie Curve* of global atmospheric electrical potential, which shows a basic whole-earth pulsation with a maxima around 19 hours Universal Time (UT), and a minima around 3 hours UT.

15. The OBRL Archives - Research

* OBRL has nearly completed making digital copies of audiotape recordings of various lectures by scientists and physicians following in Reich's track. These will be added to the growing list of items in the OBRL Archive.

* OBRL is now starting the in-house digital transfer and preservation of James DeMeo's own massive Hi8 videotape archives, which cover his extensive experimental and field work projects, plus various lectures and seminars, as undertaken since the 1980s.

* OBRL is organizing now to render into digital format the Archaeological-Historical Data Archive created by Prof. James DeMeo during his undergraduate years at the University of Kansas. That unique material is composed of over 10,000 individual index cards, each of which contains notes on historical events related to human behavior, at specific times and locations, by which one can assess the flux and flow of social peace and violence around the world. This will require hiring of a typist for data entry into the FileMaker program. Later on, this same data, and other data used by Prof. DeMeo in the creation of his *Saharasia* world maps, will be used to create a dynamical on-line geographical information system.

* Soon, OBRL will open its library and archive materials to members of the public engaged in authentic research on the subject of Wilhelm Reich and Orgonomy, via an application process. An announcement with details will be forthcoming in early 2011.

16. Once More, About the OBRL On-Line Bookstore.

Our Books are Wonderful for Christmas Gifts!

Natural Energy Works, the mail-order and on-line bookstore for OBRL, has a selection of books on innovative scientific discoveries & heresies, avoiding the usual mystical mumbo-jumbo, all by solid research scientists, including works by Wilhelm Reich, Harold Burr, Giorgio Piccardi, James DeMeo ... a "Who's Who" list of the banished and nearly forgotten scientists of the 20th Century, whose work will hopefully guide the 21st. Also there is a great selection of electromagnetic field meters, the new Experimental Life Energy Meter, and much more. Come browse the website offerings at your leisure and get those items you always wanted.

<http://www.naturalenergyworks.net>

17. Please Consider Making a Donation, or Bequest in your Will

All the projects and research, the construction and equipment purchases described in our Newsletters and on our website, were made possible only by generous donations from people like yourself. Please consider to make a donation to our research and activities. Rather than preparing the usual fundraising letter, we invite you to review James DeMeo's four decades of experimental research and educational programs, by reviewing his publications and lectures over the years, as listed here:

<http://www.orgonelab.org/demeopubs>

and also the materials in the various OBRL-Quarterly Newsletters. They are available as PDF downloads, from here:

<http://www.orgonelab.org/OBRLNewsletter.htm>
